

# PLANETS MOBILE

## ***Sun***

1. Fold each of the 4 large sun pieces in half.
2. Put a knot at the end of the string and sellotape string down the fold of one sun piece (with knot preventing the string slipping out of the sellotape)
3. Glue the 4 suns back-to-back. Do one half at a time. Don't forget to glue the 1st & 4th halves together.
4. Draw a face on each of the 4 small circles.
5. Flatten the 3D sun and stick the medium sun and the face circle in the middle.
6. Crease a fold in them and continue with the other 3 sides.

## ***Earth***

1. Colour in sea & land
2. Repeat as above with string & folding & glueing

## ***Saturn***

This is a little bit more tricky.

3. Do the string, fold & glue the 4 circles as above
4. Place the large ring in position - when the top edges touch the sides of the circle there will be a little bit showing below.
5. Glue the big ring and stick it in that position (the ends of this first one will not be stuck to anything but as you continue on the next side, they will stick to each other.
6. Continue on all other sides.
